Subj: CONTRACT N62470-92-F-5221/JN14 - UPGRADE STEAM DISTRIBUTION
SYSTEM, INDIAN HEAD DIVISION, NAVAL SURFACE WARFARE CENTER,
INDIAN HEAD, MARYLAND

Gentlemen:

Congratulations for completing the subject contract in such an outstanding manner, on time, and within budget. Your firm's superb project management, dedication to high quality, safety, and success in completing this project during the premium heating season was truly remarkable.

In particular, I would like to thank Pepco Services project management team of Bob Hollis, Tom Lang and John Fratangelo for guiding this project to success. John Fratangelo - whose professionalism, integrity and technical "know-how" in the field office superbly managed this project from groundbreaking to completion. Work had to be scheduled to keep critical explosives manufacturing and storage buildings heated during the winter months.

John's dedication to the project was truly appreciated by the Resident Officer in Charge of Construction and staff.

In addition, I would like to commend your subcontractor, Welch and Rushe whose project Management team of Pat Tonker and John D. Welsh really made this project such a tremendous success. John D. Welsh was a truly dynamic force in the field, whose dedication to scheduling and high quality work cannot be over-estimated. I would not hesitate to recommend Welch and Rushe as a subcontractor for work on future Navy projects.

Please accept this letter as sincere recognition of your impressive performance on this project.

Thank you for a job well done and good luck on future Navy projects.

Sincerely,

Darrell J. Klinger
Senior Eng. Tech.
