Re: Georgetown Day School – June 1 Mechanical Start-Up

Dear Maury,

At our foreman's meeting today, we discussed the status of start-up of the mechanical systems to provide atmosphere/humidity control at the gym and Link building of the Georgetown Day School project. As you know, we have all been working towards a June 1 milestone date for this goal. Based off of our meeting this morning, it appears that we will be in a position to turn on the system tomorrow and begin providing atmosphere and humidity control in the gym. This will allow finish work in the gym to move forward.

The June 1 milestone date set by Whiting-Turner was a very optimistic goal. Through the hard work of Welch & Rushe, CMC Sheet Metal, Boland-Trane, your suppliers and others, this goal has become a reality. Whiting-Turner would like to congratulate everyone on an excellent job performed to meet this goal. WR's steamfitter foreman Rick Rodda has done an excellent job coordinating and installing a large amount of steamfitter pipe in not only a short time but often-in tight physical spaces as well. CMC's office, detailers, shop and field foreman Billy have been able to help drive the MEP rough-in and stud work by having material onsite when expected and following that with a quick installation. Boland-Trane has been able to step up and knock out the required controls and is in the process of loading their software. WR's plumbing foreman Mike Beuchert and Joe have been able to stay ahead of the game on the plumbing side in order to ease the installation of mechanical systems.

The owners at the Georgetown Day School, the owner's representative, the A&E, and numerous visitors have all commented on the quality work you have performed to date and the smoothness with which it has occurred.

Thanks for all your hard work and efforts to hit the June 1 milestone. We look forward to continued success as construction continues. Let's take the momentum we have built up in Phase I and carry that on through to Phase I completion by September 1 and into Phase II starting next week.

Very truly yours,  
THE WHITING-TURNER CONTRACTING COMPANY
