

**Dear Pete,**

I have had the distinct pleasure to work with Welch & Rushe at the National World War II Memorial project for the past 2 1/2 years. Specifically, I have worked with Pat Tonker, John Welch and Tim Wettlaufer. Their performance has been exemplary and their contributions have been paramount to our success. Not only has the quality of their work been superb, they have contributed their vast experience and knowledge in ways that have added value to the project for the Government and all those who will visit the Memorial for decades to come.

**Kenneth J. Terry**
